Summary

Software Engineer with experience in Data Engineering, Customer Data Platforms (CDPs), ETL pipelines, Python, SQL, Java, and Spring Boot. Skilled in data ingestion, data transformation, database integration, REST API development, and containerized environments using Docker. Strong foundation in OOP, DBMS, and software engineering principles.

Technical Skills

- **Languages:** Java, SQL
- **Data Engineering:** ETL Pipelines, Customer Data Platforms (CDP), Data Ingestion, Data Quality Checks
- **Backend:** Spring Boot, REST APIs
- **Frontend:** React.js
- **Databases:** PostgreSQL, MySQL, MongoDB, ClickHouse
- **Tools & Platforms:** Linux, Git, GitHub, Postman, Docker, Docker Compose, Vercel, Render
- **Core Concepts:** OOP, DBMS, Data Structures and Algorithms

Experience

Data Engineer – Cholamandalam Investment and Finance Company Limited Oct 2026 – Present
Chennai, India

- Work with Customer Data Platform (CDP) concepts and ETL pipelines using Python and SQL for data integration and processing.
- Use Docker and Docker Compose to configure and manage containerized development environments.
- Support data ingestion, transformation, and database operations in data engineering workflows.

Software Engineer Trainee – MountBlue Jul 2026 – Oct 2026
Bengaluru, India

- Completed three months of training in Java, Spring Boot, PostgreSQL, MySQL, Linux, Git/GitHub, and software engineering practices.
- Developed and tested REST APIs using Java and Spring Boot, integrating backend functionality with relational databases.
- Built a Blog Application using Spring Boot, PostgreSQL, and Spring Security, implementing CRUD operations for posts, comments, and tags, authentication, authorization, pagination, search, filtering, and sorting.
- Practiced Git/GitHub version control, branching, and collaborative development workflows.

Projects

Customer360 – Data Engineering Pipeline GitHub
Python, SQL, PostgreSQL, ClickHouse, Docker, Docker Compose

- Built a data ingestion pipeline to load customer, order, payment, identity, support ticket, campaign, and consent data from CSV and JSONL files.
- Implemented SQL transformations to create cleaned datasets and performed data quality checks for missing values, duplicate records, and data relationships.
- Configured PostgreSQL and ClickHouse using Docker Compose to support the local data engineering environment.

MotionVille – Video-Sharing Platform GitHub
Java, Spring Boot, Spring Data JPA, React.js, PostgreSQL, REST APIs

- Developed backend REST APIs for user management, channel management, and subscriptions in a video-sharing platform.
- Used Spring Boot, Spring Data JPA, and PostgreSQL to manage application data and entity relationships.
- Implemented subscription and unsubscription operations, subscriber retrieval, and subscription-status checks.
- Applied database constraints to maintain data integrity and prevent duplicate subscriptions.

Education

Master of Computer Applications (MCA) July 2024 – June 2026
Graphic Era Hill University, Dehradun

Bachelor of Science in Computer Science Aug 2020 – Aug 2023
SSJ University, Almora
